The Cloud
With a mark on my hand
And a mark on my forehead
The pillar of cloud and fire
Show me the way

To the shores by the sea
I fell down on my knee
To find a way to be free
To be free

Remember the days long time ago
When the faith were stronger
And my heart were younger

Remember the days long time ago
When the faith were stronger
And my heart were younger

With a mark on my hand
And a mark on my forehead
You told me to go strap on my sword
Go back and forth from gate to gate
Cut down brothers cut down sisters
Friends and neighbors

Remember the days long time ago
When the faith were stronger
And my heart were younger

Remember the days long time ago
When the faith were stronger
And my heart were younger

With a mark on my hand
And a mark on my forehead
You want me to give life for life, eye for eye
Tooth for tooth, hand for hand, foot for foot
You want me to give burn for burn
Wound for wound, scratch for scratch

Remember the days long time ago
When the faith were stronger
And my heart were younger

Remember the days long time ago
When the faith were stronger
And my heart were younger
