Red 4/4 120 BPM

Might be blind don’t knew how to find your way back home
Might be kind really don’t knew how to shine
Might be worried about the way the world has changes
Might be concerned about the environment

We should go together search the truth
Fight without fear you and me
We work together find our youth
Save the world you and me

Might be confused and blurry in your mind
Might be afraid through these signs of our time
Might be lonely with no friends to call
Might be rich yet afraid to fall
Might be sad that you are lost in space
Lost in between doubt and faith

Save the world me and you
Save the world you and me
We will save the world
We will save the world you and me

Even though the rain is falling hard
We have to play the game with our given cards
Before end of time we could change the signs
One steaming force so rise and shine

Save the world me and you
Save the world you and me
Save the world me and you
Save the world you and me
